

Carbon offset certificate

Certificate No: 02-22
Issued October 6th 2022

This certificate is awarded to:

Company logo

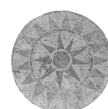

For planting 2,500 balsatrees and thereby offsetting

200 TONS OF CO2 EMISSIONS

By offsetting through the Growing Trees Network Foundation and the Wawazonia Project, you support a sustainable carbon offset project that reduces greenhouse gas emissions, halts deforestation in the Amazon, and promote sustainable development in the local indigenous Shuar communities. In addition to offsetting 200 tons of CO₂ (40 tons/year from 2022-27), planting 2,500 trees helps to protect 3 hectares of primary rainforest in the Amazon.
